RAVLT: time between correct words

Overview at each stage for patients number 64, 72, 91, 107, compared to the healthy control range

RAVLT: time between correct words

Stage 1	Based on average number of correct words in HC	Based on each time between words	Overally (always true or always false)
Comparable to HC	66 (56%)	63 (53%)	40 (34%)
Not comparable to HC	53 (44%)	56 (47%)	30 (25%)

Stage 2			
Comparable to HC	70 (59%)	52 (44%)	33 (28%)
Not comparable to HC	49 (41%)	67 (56%)	36 (30%)

Stage 3			
Comparable to HC	65 (55%)	61 (51%)	40 (34%)
Not comparable to HC	54 (45%)	58 (49%)	33 (28%)

Stage 4			
Comparable to HC	65 (55%)	61 (51%)	40 (34%)
Not comparable to HC	54 (45%)	58 (49%)	33 (28%)

Stage 5			
Comparable to HC	53 (44%)	65 (55%)	38 (32%)
Not comparable to HC	66 (55%)	54 (45%)	39 (33%)

Stage 1	Within normal range Time between words	Outside normal range Time between words
Within normal range Number of correct words	40	26
Outside normal range Number of correct words	23	30

Stage 2	Within normal range Time between words	Outside normal range Time between words
Within normal range Number of correct words	33	16
Outside normal range Number of correct words	34	36

Stage 3	Within normal range Time between words	Outside normal range Time between words
Within normal range Number of correct words	40	25
Outside normal range Number of correct words	21	33

Stage 4	Within normal range Time between words	Outside normal range Time between words
Within normal range Number of correct words	45	22
Outside normal range Number of correct words	17	35

Stage 5	Within normal range Time between words	Outside normal range Time between words
Within normal range Number of correct words	38	15
Outside normal range Number of correct words	27	39
